

AutoCAD Technician for Civil and Structural Engineering Firm

Job details

Job Type: Full-time

Number of hires for this role: 1 possibly 2

Qualifications

- High school or equivalent
- Technical College in AutoCAD or 2 years of experience (preferred but not required)

Appian is seeking a CAD Drafter for our Design Department with 2 or more years of CAD experience in either residential and/or commercial building drawings or civil or municipal site drawings. Responsibilities will generally include:

- Working with a design team led by a Licensed Professional Engineer, to provide support by creating 2D & 3D drawings.
- Checking engineering team's drawings, models, and other project deliverables.
- Ensuring clean file organization is followed.
- Work with engineering team on larger projects to complete projects according to deadlines.
- Ability to learn software and hardware products and their operation.
- Problem Solving.
- Responsibility will involve occasionally out of town trips for field recon work.
- US citizen

We have found that self-taught AutoCAD drafter or Designer succeed the best in our firm. Any candidate who is mechanically inclined, a self-starter, and enjoys construction often finds great success here and love what they do. And, if you want to be an Engineer, we'll help train you in that direction too.

Other things that will make us very interested in you:

- Experience in either 3-D modeling, Adobe Photoshop, or photography/videography
- Interest in math (algebra, trigonometry, and/or geometry)
- Possession of a FAA Drone Pilot License
- Proficiency with Desktop Office Applications (Example: Microsoft Office Suite [MSWord, Excel])
