

## **CIVIL/STRUCTURAL ENGINEER**

**Appian Consulting Engineers** is a dynamic consulting firm of engineers and designers providing civil, structural and municipal engineering to local, regional and national clients. For more than three decades, our highly respected team of engineers and designers spur each other on toward innovative thinking and professional growth. Appian Consulting Engineers, is a multi-disciplined Civil, Municipal and Structural Engineering firm serving North Carolina, Virginia, and South Carolina. Appian possesses some of the latest equipment and technology related to our field and diligently maintains the latest release on all of our software. We have an exciting opportunity for you to join our team.

### **Job Description**

- Engineer who provides technical design support and assists with project management of civil, structural and municipal projects, including: structural analysis and design (commercial buildings, renovations, raising of residential houses), infrastructure projects (water, wastewater, roads, drainage), and land development (site layout, grading, erosion control, stormwater management, etc.).
- Additional job responsibilities will vary based on qualifications may include: structural inspections, obtaining field measurements by use of 3D LiDAR hand-held scanner, UAS/drone piloting for aerial imagery, videography, photographic renderings using Adobe Photoshop, etc.
- Responsible for managing multiple, concurrent projects while maintaining quality, schedule, and budget objectives.

### **Skills & Experience**

- BS in Civil Engineering, Construction Engineering, or related field
- AutoCAD experience preferred
- Ability to learn new tasks and design software quickly.
- Ability to work effectively under pressure and time-sensitive situations.
- Must be self-motivated, team-oriented person who works well with others.
- Valid driver's license

Appian works on some very large industrial and commercial projects.
